- ✓ Stainless Steel Hardware, Hinges and Springs
- ✓ Automatic Hold-Open Arm
- ✓ Flush Drop Handle

STANDARD DOUBLE DOOR

INNOVATIONS & OPTIONS

U.S.F. FABRICATION, INC. continuously improves its product with innovative features. Some of these are:

- ✓ Spring Assistance to enable safe and easy operation of the doors by one person without the need for additional lifting equipment.
- ✓ Box Type Reinforcing provides a more compact design in order to maximize clearance between the cover and equipment below.
- ✓ The Hatch Safety Net is an optional safety net system designed to reduce the risks associated with open hatches, by preventing fall through. The net is easily opened to facilitate entry.

U.S.F. FABRICATION, INC. Airside Hatches can also be manufactured to meet custom specifications.

Available options include:

- ✓ Bolted & Gasketed Floodtight - Gastight
- ✓ All Stainless Steel Construction
- ✓ Covers Bolted for Security

COVERS & GRATING

U.S.F. FABRICATION, INC. manufactures a complete line of Airside Covers and Grating designed to meet your specific requirements, including:

- ✓ Cast Iron Rings with Steel Galvanized Covers
- ✓ Steel Galvanized Multiple Cover assemblies for Valve Pits
- ✓ Steel Galvanized Frames and Grates
- ✓ Steel Galvanized Catch Basin with Peripheral Trough

CATCH BASIN with PERIPHERAL TROUGH

MANHOLE RING & COVER

MULTIPLE COVERS

OTHER PRODUCTS

In addition to our airside capabilities, U.S.F. FABRICATION, INC. offers a variety of products to meet all your landside needs for underground access and drainage, including:

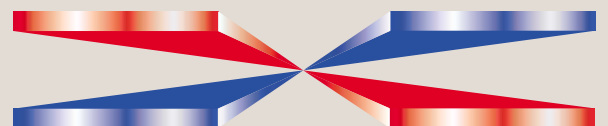

- ✓ Aluminum and Steel Access Doors
- ✓ Cast Iron Manhole Rings and Covers
- ✓ Steel, Cast Iron and Aluminum Grating
- ✓ Recessed Floor Doors for carpeted or tiled applications
- ✓ Aluminum and Steel Wall Mounted Ladders

All U.S.F. FABRICATION, INC. products are manufactured utilizing state of the art equipment by a team of highly skilled and dedicated people. Our engineering and customer service staff have the knowledge and technical expertise to assist you with your specific design requirements.

LOOKING TOWARD THE FUTURE . . .

The origins of our company date back to 1916 when Alex DeBogory Sr. established a company near downtown Miami known as the 7th Street Bicycle Repair and Welding Company.

In August of 1996 the Fabrication Division of U.S. Foundry & Mfg. Corp. became U.S.F. Fabrication, Inc. and relocated to a modern new manufacturing facility. The Company consists of four divisions: Aluminum Floor Access Door Division, Steel Fabrication Division, Steel Grating Division and Rolling Division.

He believed in the axiom that "A solid foundation is a prerequisite to build". This is true in every type of construction or project, it is also true when building a business. Alex DeBogory, Sr. recognized that quality products, superior craftsmanship and outstanding customer service would serve as the hallmark for this foundation.

This philosophy has been the trademark that allowed a small bicycle repair shop to develop into the six distinct companies that we are today.

U.S. Foundry & Mfg. Corp. (Inc. 1937)
Formerly known as The 7th Street Bicycle Repair & Welding Company (1916-1920),
U.S. Welding & Iron Works (1920-1937).

U.S. Precast Corp. (Inc. 1970)
Florida Lift Stations Corp. (Inc. 1980)
Tri-County Concrete Products, Inc. (Inc. 1987)
U.S. Holdings, Inc. (Inc. 1990)
U.S.F. Fabrication, Inc. (Inc. 1996)

As the companies and divisions grew, we knew we could better serve our customers by creating new companies with names that would better identify their individual products and services. Additionally, this would enable each business and its employees to gain their own pride and identity.

GREAT
OAKS

LITTLE
ACORNS
GROW.

As we lead our industry into the 21st century, U.S.F. Fabrication, Inc. remains proud of our humble beginnings. We will continue to "Set the Standard" by

investing in our people and technology, to facilitate continuous improvement of our existing products and the development of new ones so that we may better serve our customers and their needs.

The four generations of the DeBogory family thank you for affording us the opportunity to grow and serve you.

Sincerely,

Alex DeBogory, Jr.
President
