U.S.F. FABRICATION, INC.

Our Modern Manufacturing Facility

U.S.F Fabrication, Inc. is a full service metal fabrication company with the equipment, skilled workforce and leadership to meet the most demanding requirements. Our 80,000 - sq.ft. facility features some of the latest technological metal fabrication equipment. Our engineering staff can design and develop drawings to meet your specifications. Our dedicated workforce undergoes continuous training in the latest technical methods to enhance their individual craftsmanship and maintain their professional certifications. Our leadership provides vision for future growth, organization for effective and efficient operations, and motivation for our personnel to make quality products and give superior service to our customers. Let us have an opportunity to satisfy your metal fabrication needs.

LOOKING TOWARD THE FUTURE...

The origins of our company date back to 1916 when Alex DeBogory Sr. established a company near downtown Miami known as the 7th Street Bicycle Repair and Welding Company.

He believed in the axiom that "A solid foundation is a prerequisite to build". This is true in every type of construction or project, it is also true when building a business. Alex DeBogory, Sr. recognized that quality products, superior craftsmanship and outstanding customer service would serve as the hallmark for this foundation.

This philosophy has been the trademark that allowed a small bicycle repair shop to develop into the six distinct companies that we are today.

U.S. Foundry & Mfg. Corp (Inc. 1937) Formerly known as The 7th Street Bicycle Repair & Welding Company (1916-1920), U.S. Welding & Iron Works (1920-1937).

U.S. Precast Corp. (Inc. 1970)

Florida Lift Stations Corp. (Inc. 1980)

Tri-County Concrete Products, Inc. (Inc. 1987)

U.S. Holdings, Inc. (Inc. 1990)

U.S.F. Fabrication, Inc. (Inc. 1996)

U.S Environmental Services, Inc. (Inc. 1998)

As the companies and divisions grew, we knew we could better serve our customers by creating new companies with names that would better identify their individual products and services. Additionally, this would enable each business and its employees to gain their own pride and identity.

In August of 1996 the Fabrication Division of U.S. Foundry & Mfg. Corp. became the U.S.F. Fabrication, Inc. and relocated to a modern new manufacturing facility. The company consists of four divisions: Aluminum Floor Access Door Division, Steel Fabrication Division, Steel Grating Division and Rolling Division.

**GREAT OAKS
FROM LITTLE
ACORNS
GROW.**

As we lead our industry into the 21st century, U.S.F. Fabrication, Inc. remains proud of our humble beginnings. We will continue to "Set the Standard" by investing in our people and technology, to facilitate continuous improvement of our existing products and the development of new ones so that we may better serve our customers and their needs.

The four generations of the DeBogory family thank you for affording us the opportunity to grow and serve you.

Sincerely,

A handwritten signature in cursive that reads "Alex DeBogory, Jr." in black ink.

Alex DeBogory, Jr.
President.
