- Standard and custom sizes available
- 10 year manufacturer's warranty
- Manufactured in the U.S.A.

ROOF ACCESS

Model SRR-I
with Interior Mounting Flange

Model SRR-E
with Exterior Mounting Flange

Model SRR

FEATURES

The SRR Series hatch provides secure, convenient and weather resistant access onto roofs and into reservoirs

- All hardware 316 Stainless steel: hinges, hold-open arm and slamlock
- Frame flange with mounting holes for securing to roof or deck
- Frame is equipped with a weather seal gasket
- Stainless steel compression springs for lift assist
- Standard and custom sizes available
- 10 year manufacturer's warranty
- Manufactured in the U.S.A.

OPTIONS

- Exterior mounting flange
- Smooth plate cover
- Enclosed compression springs
- Electrostatic powder coated finish
- All stainless steel construction

SPECIALTY VAULT DOORS

U.S.F. Fabrication manufactures the most extensive line of doors for underground access. With over 94 years experience and 60,000+ drawings, we have solutions for any application.

THS Aluminum
with safety grate

W-APS Aluminum –
Floodtight/Gastight

UFC Steel Galvanized

TPS Steel Galvanized
with vent grate

Looking Toward The Future...

A Message from Alex DeBogory, Jr.

The origins of our company date back to 1916 when Alex DeBogory Sr. established a company near downtown Miami known as the 7th Street Bicycle Repair and Welding Company.

He believed in the axiom that "A solid foundation is a prerequisite to build". This is true in every type of construction or project, it is also true when building a business. Alex DeBogory, Sr. recognized that quality products, superior craftsmanship and outstanding customer service would serve as the hallmark for this foundation.

This philosophy has been the trademark that allowed a small bicycle repair shop to develop into the four distinct companies that we are today.

U.S. Foundry & Mfg. Corp (Inc. 1937) Formerly known as The 7th Street Bicycle Repair & Welding Company (1916-1920), U.S. Welding & Iron Works (1920-1937):

U.S. Precast Corp. (Inc. 1970)

Florida Lift Stations Corp. (Inc. 1980)

U.S.F. Fabrication, Inc. (Inc. 1996)

As the companies and divisions grew, we knew we could better serve our customers by creating new companies with names that would better identify their individual products and services. Additionally, this would enable each business and its employees to gain their own pride and identity.

In August of 1996, the Fabrication Division of U.S. Foundry & Mfg. Corp. became U.S.F. Fabrication, Inc. and relocated to a modern new manufacturing facility. The company consists of four divisions: Aluminum Floor Access Door Division, Steel Fabrication Division, Steel Grating Division and Rolling Division.

As we lead our industry into the 21st century, U.S.F. Fabrication, Inc. remains proud of our humble beginnings. We will continue to "Set the Standard" by investing in our people and technology, to facilitate continuous improvement of our existing products and the development of new ones so we may better serve our customers and their needs.

The four generations of the DeBogory family thank you for affording us the opportunity to grow and serve you.
