

ACCESS SOLUTIONS POWERED BY INNOVATION

At USF Fabrication, we engineer more than just traditional lift-assist access doors - we deliver **Power Actuated Access Doors** designed for larger openings and effortless operation

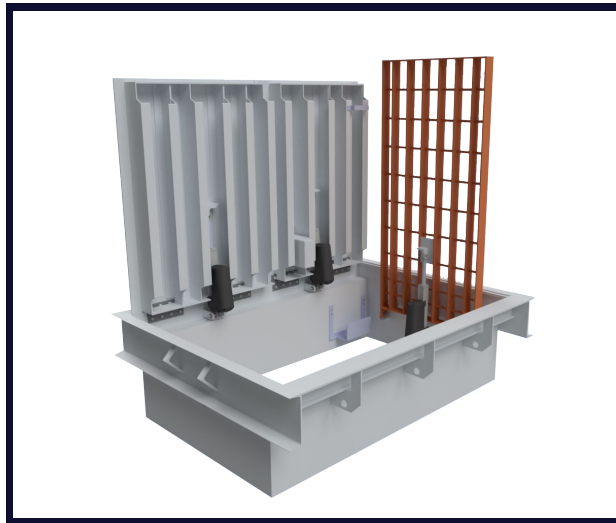

Whether activated by **push button, key fob, Bluetooth**, or integrated with your **existing access control system**, our solutions offer unmatched convenience, safety, and security

Powered by **24V LINAK actuators**, our doors are built for reliability and safety. These water-proof actuators (rated **IP66/IP69**) ensure smooth, dependable performance in demanding environments

Key Features

- **Power Actuated Operation**
- **Multiple Access Options:** Push button, key fob, Bluetooth, or credentialed access
- **Safe & Reliable:** Waterproof actuators with emergency manual override
- **Customizable Configurations:** Compatible with most USF door types
- **Fall Protection Integration:** Optional power-actuated safety grates

Available across a wide range of door types, configurations, materials, and load ratings, our Power Actuated model access hatches are ideal for utility, industrial, and architectural applications
